

MAG PEN 3

Rechargeable LED pencil work light with 150 lumen

ORIGINAL
SCANGRIP

SINCE 1906

The slim and elegant MAG PEN 3 pencil work light is a "must have" for every professional user – always at hand!

// New upgraded version

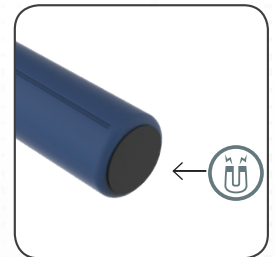

Compared to the previous version, MAG PEN 3 has been upgraded with the highly efficient COB LED technology, providing up to 150 lumen. It has also been upgraded with a stepless dimmer function in the range of 10 % to 100 % that enables you to easily adjust the light output to the work task.

The MAG PEN 3 provides a powerful illumination, both from the lamp head and precision top light. A side switch ensures easy single-handed switch on/off operation.

Featuring a sturdy rubber surface and a durable construction with a comfortable grip, the design is compact allowing access in the most inaccessible places.

MAG PEN 3 comes with built-in magnets for suspension or storage - both in the clips (improved for MAG PEN 3) and at the bottom of the penlight. The turnable clips makes the built-in magnet more usable for difficult work areas and at different angles.

MAG PEN 3 is easily rechargeable with USB cable, which avoids time-consuming, annoying replacement of batteries.
