

# MAG

Multipurpose and rechargeable LED inspection work light and flashlight in one

ORIGINAL  
SCANGRIP

SINCE 1906

The next generation of the popular MAG bestseller, which integrates work light and flashlight functionality in one, reintroduced in a new and modern design. Made with the latest, high performance LED technology the new MAG work light provides two times more light output than the first generation MAG does.

MAG is made for efficient workshop operation through complete flexibility using the three strong built-in magnetic holders and the two retractable suspension hooks. This provides for flexible positioning of the work light wherever you need it. The modern design of the MAG offers an ergonomic and user-friendly grip, and the flexibility of the lamp head allows tilting up to 180 degrees.

With an improved price and performance ratio, outstanding light output in both spotlight and mainlight, and USB charging, the redesigned MAG work light offers great value in every working operation.
